

# AFRICAN CENTER OF TROPICAL ECOLOGY

— *Leading Ecology Research Institute in Africa* —

## INTERNATIONAL FIELD SCHOOL

International Field School is a Summer School designed for local and international university and college students and research scientists who are interested to enrich their knowledge with biology and ecology of tropical ecosystems (Forests, Savannah, Wetlands and Grasslands) and dependency of these ecosystems by local communities for their livelihoods. The Summer School will offer the best outdoor learning opportunities and practices through field-based courses and seminars.

There are 7 course units and each unit can be taken singly or in combination with other units on the list. The course duration ranges from two weeks to four weeks depending on available resources and time allocation by different institutions. However those interested in taking more time especially in research of more than one month at the Center are also welcome and should apply for registration of the same with the center. Course units include:

Course Units	Semester Dates		
	October	November	December
Biology and Ecology of African Natural Forests and Rangelands (Savannah)	✓	✓	✓
Environmental Management and Restoration of Rural Landscapes	✓	✓	✓
River Ecology and Sustainable Water Management	✓	✓	✓
